wdea@bnu.edu.cn

About Us

The World Digital Education Alliance actively responds to the spirit of the United Nations Transforming Education Summit and the UNESCO 2030 High-Level Steering Committee on Education. It aims to create an important international platform for enhancing dialogue and communication, deepening pragmatic cooperation, and promoting high-quality development in digital education. Centered around the core task of advancing the digital transformation of education, the alliance seeks to establish a long-term mechanism for international cooperation in digital education. It aims to promote the comprehensive participation of all stakeholders in global digital education governance, collectively fostering the digital transformation of education to ensure that everyone has access to more equitable, inclusive, and high-quality education.

Vision and Missions

The WDEA will center its efforts on the core mission of advancing digital transformation in education, focusing on the following key areas:

● Supporting Members in Developing Digital Education

Analyze worldwide digital education policies, case studies, and trends to provide members with strategic guidance while developing international standards to enhance resource interoperability and technological compatibility.

● Building an International Dialogue Platform

Create an international dialogue platform through a cooperative network that facilitates multi-level exchanges among members.

● Promoting Global Sharing of Digital Education Resources

Promote global sharing of high-quality digital resources like MOOCs and e-textbooks, with particular focus on supporting developing nations and disadvantaged groups.

● Supporting International Digital Education Publications

Support members in disseminating research findings and policy recommendations through two key publications: an Annual Research Report and a Digital Education Bulletin.
