

Smart Computing and Intelligence

Series Editors

Kinshuk, Athabasca, AB, Canada

Ronghuai Huang, Beijing Normal University, Beijing, China

Demetrios Sampson , Department of Digital Systems, University of Piraeus, Piraeus, Greece

This book series aims to establish itself as a medium for the publication of new research and development of innovative paradigms, models, architectures, conceptual underpinnings and practical implementations encompassed within smart computing and intelligence.

The scope of the series includes but is not limited to smart city, smart education, health informatics, smart ecology, data and computational analytics, smart society, smart learning, complex systems-chaos, computational thinking, brain computer interaction, natural/computer interaction, humanoid behaviour, and impact of educational psychology on computing.

The cornerstone of this series' editorial policy is its unwavering commitment to report the latest results from all areas of smart computing and intelligence research, development, and practice. Our mission is to serve the global smart computing and intelligence community by providing a most valuable publication service.

Contents

1	Preface: Embracing a New Era: Facilitating Teaching and Learning Through Robotics	1
1.1	Artificial Intelligence and Robotics in Education	1
1.2	Guiding Policies for Promoting Educational Robots	2
1.3	Key Technologies for Educational Robots	2
1.4	Learning with Educational Robots	4
1.5	Purpose of This Book	6
2	Reading Guidelines of This Handbook	9
2.1	Defining Educational Robots	9
2.2	The Selection of Papers and User Guidance	9
2.3	Thematic Topics of Educational Robot	11
3	Background Material Necessary for the Effective Use of This Book	15
3.1	Terms and Theories	15
3.2	Research Organizations Briefing	23
3.3	Influential Journals	34
3.4	Robot Taxonomy	41
4	Personalized Tutoring Through Conversational Agents	59
4.1	What If the Devil is My Guardian Angel: ChatGPT as a Case Study of Using Chatbots in Education	67
4.2	Engineering Education in the Era of ChatGPT: Promise and Pitfalls of Generative AI for Education	79
4.3	Preparing Educators and Students for ChatGPT and AI Technology in Higher Education: Benefits, Limitations, Strategies and Implications of ChatGPT & AI Technologies	82

5	Robotics in STEM Education	87
5.1	Robotics and STEM Learning: Students' Achievements in Assignments According to the P3 Task Taxonomy—Practice, Problem-Solving, and Projects	90
5.2	Using Mastery Learning Theory to Develop Task-Centered Hands-On STEM Learning of Arduino-Based Educational Robotics: Psychomotor Performance and Perception by a Convergent Parallel Mixed Method	94
5.3	Collaborative Robotics, More Than Just Working in Groups	98
6	Robot-Based Practices in Programming	105
6.1	Active Learning Environments with Robotic Tangibles: Children's Physical and Virtual Spatial Programming Experiences	107
6.2	A Tool for Introducing Computer Science with Automatic Formative Assessment	110
6.3	High School Students' Views on the PBL Activities Supported via Flipped Classroom and LEGO Practices	113
6.4	The Effects of Different Programming Trainings on the Computational Thinking Skills	118
6.5	Other Papers	121
7	Language Learning with Social Robots	123
7.1	Teaching and Learning with Children: Impact of Reciprocal Peer Learning with a Social Robot on Children's Learning and Emotive Engagement	125
7.2	Intelligent Personal Assistants: Can They Understand and Be Understood by Accented L2 Learners?	129
8	Teaching with Robotics in Classroom	135
8.1	The Effect of Programming on Primary School Students' Mathematical and Scientific Understanding: Educational Use of mBot	137
8.2	Exploring the Evolution of Two Girls' Conceptions and Practices in Computational Thinking in Science	142
8.3	A Systematic Review of the Literature Regarding Socially Assistive Robots in Pre-tertiary Education	146
8.4	Analyzing the Effect of the Use of 3D Simulations on the Performance of Engineering Students in a Robotics Course: Findings from a Pilot Study	150
9	Robot-Assisted Special Education	155
9.1	Review of Assistive Technology in the Training of Children with Autism Spectrum Disorders	158
9.2	Other Articles for Robot-Assisted Special Education	163

10 Robotics-Based Cognitive Training for the Senior People 167

 10.1 The Humanoid Robot Sil-bot in a Cognitive Training
 Program for Community-Dwelling Elderly People
 with Mild Cognitive Impairment During the COVID-19
 Pandemic: A Randomized Controlled Trial 169

 10.2 The Humanoid Robot NAO as Trainer in a Memory
 Program for Elderly People with Mild Cognitive
 Impairment 173

 10.3 Mini: A New Social Robot for the Elderly 176

11 Requirement Analysis from Key Stakeholders 181

 11.1 Research Method 181

 11.2 Questionnaire Survey from Different Groups 182

 11.3 Needs from Different User Groups and Implications 217

Highlights and Recommendations 223

Postscript 227

**Appendix 1: List of 100 Influential Academic Articles
 of Educational Robots (in Alphabetical Order)** 229

**Appendix 2: Top Organizations, Publications Sorted by Citation
 in WoS** 245

**Appendix 3: Typical Open-Source AI Platforms and Large
 Language Models** 247

Appendix 4: A Brief of Educational Robot Industry 251
